PLASTICLOR P48VL
CHLORINATED PARAFFIN

Reg. No. 2003/017152/07

SAFETY DATA SHEET
PLASTICLOR P48VL
CHLORINATED PARAFFIN

SDS 016/R8
2017-07-21

SECTION 1. Identification – Chemical Product and Company

Trade Name : Plasticlor 45VL
Chemical Name : Chlorinated paraffin
Proper Shipping Name : Environmentally hazardous substance, liquid N.O.S.
UN Number : 3082
CAS Number : 85535-85-9
GHS product identifier : Alkanes, C14-17, chloro chlorinated paraffins, C14-17
Chemical Family : Halogenated hydrocarbons
Chemical Formula : $C_xH_{(2x+y+2)}Cl_y$ where $x = 14-17$ and $y =1-17$
Other means of identification : Clear, pale yellow mobile liquid, slight characteristic odour
Recommended use of the chemical : Plasticizer for flexible PVC compounds, other Polymers and to partially replace expensive flame-retardants
Restrictions on use : Not for use in products used in childrens’ toys or food contact application
Supplier’s details : NCP Chloorchem (Pty) Ltd
Address : Cnr. Allandale Road and Chloor Road
           Chloorkop, Gauteng
           South Africa:
Telephone No. : +27 (0) 11 921 3111
24hour Emergency phone number : +27 (0) 11 976 2115

SECTION 2. Hazards Identification

GHS classification of the substance: corrosive liquid, irritating to skin and eyes, and harmful to aquatic life

<table>
<thead>
<tr>
<th>Hazard classes/Hazard categories</th>
<th>GHS Hazard Statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aquatic Acute 1</td>
<td>H400 Very toxic to aquatic life</td>
</tr>
<tr>
<td>Aquatic Chronic 1</td>
<td>H410 Very toxic to aquatic life with long lasting effects</td>
</tr>
<tr>
<td>Lactation</td>
<td>H362 May cause harm to breast -fed children</td>
</tr>
<tr>
<td>Skin Corrosion/Irritation Category 2</td>
<td>H315 Causes skin irritation</td>
</tr>
<tr>
<td>Eye Irritation Category 2</td>
<td>H319 Causes serious eye irritation</td>
</tr>
<tr>
<td>STOT SE 3</td>
<td>H335 May cause respiratory irritation</td>
</tr>
</tbody>
</table>

NB this Substance is included in the EU CoRAP – Community Rolling Action Plan

The most important adverse effects to know in emergency are – GHS label elements, including precautionary Statements:

GHS 07 Skin & eye irritation health hazard - exclamation mark
GHS 09 Aquatic toxicity – dead tree and fish

Signal word: Warning

Hazard Statements - Skin and eye irritant - causes skin and serious eye irritation; May cause respiratory irritation; Very toxic to aquatic life with long lasting effects.
SAFETY DATA SHEET
PLASTICLOR P52L
CHLORINATED PARAFFIN

Reg. No. 2003/017152/07

Precautionary statements:
P273 Avoid release to the environment
P391 Collect spillage
P280 Wear protective gloves;
P270 do not eat, drink or smoke when using /handling this product
P302 + P352 if on skin wash off with plenty of water
P332 + P313 if skin irritation continues, get medical attention
P280 Wear eye / face protection
P305 + P351 + P38 if in eyes rinse cautiously
P362 + P364 take off contaminated clothing and wash before reuse
P261 + P271 avoid breathing mist, wear eye and face protection and use in well ventilated area
P304 & P340 if mist inhaled and breathing difficulty – remove person to fresh air and get medical attention
P301 if swallowed and feel unwell, get medical attention
P263 Avoid contact during pregnancy and while nursing

Response:
Refer Sections 5, 6 and 8

Storage:
Refer Section 7

Special Labelling requirements – refer Section 14 for transport labels

SECTION 3. Composition/information on ingredients

Chemical identity : Mixture
Other means of identity : Clear, pale yellow mobile liquid, slight characteristic odour
Common name, synonyms, etc : Chlorinated Paraffin (C14-17), Chloroalkanes, Chloroparaffin, Medium-chain chlorinated paraffin, C14-17
CAS number : 85535-85-9
EC number : 287-477-0
IUPAC name : Alkanes C14-17, chloro; Chlorinated paraffin C14-17
Stabilizing additives : epoxidized Soya Bean oil

<table>

</tbody>
</table>

Product description  C14-C17 Chlorinated hydrocarbons, (containing less than 1% C10-C13). Chlorination: 48%. Contains long-chain epoxidised soya oil as additive at concentration of <1% by weight.

Section 4. First Aid Measures

Product in eye – can cause serious eye irritation
Immediately flush eyes thoroughly for at least 10 minutes with running water. Hold eyelids open during flushing. If irritation persists, repeat flushing and obtain medical attention immediately.

Product on skin – can cause skin irritation
Remove contaminated clothing. Wash affected areas with soap and water. If irritation persists, obtain medical advice immediately. Wash contaminated clothing before reuse.

Product ingested - Do not induce vomiting. Drink water or milk if conscious. Never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Obtain medical assistance immediately.

Product inhaled – may cause respiratory irritation
Move victim to fresh air. Give artificial respiration only if breathing has stopped. Give cardiopulmonary resuscitation (CPR) if there is no breathing and no pulse. Obtain medical advice immediately.

Section 5. Fire Fighting Measures – non flammable

Product does not burn - but if heated to >70º for prolonged periods or >200º will decompose with emission of hydrogen chloride gas

Fire and explosion hazard  Slight fire hazard.

Suitable Extinguishing Media Use regular dry chemical, carbon dioxide, water, and regular foam. For large fires use regular foam or flood with fine water spray.

Special hazards During a fire in which this material is involved, hydrogen chloride (HCl) may be liberated. Avoid inhalation of material, stay upwind and keep out of low areas.

Protective clothing - Wear full protective clothing and self-contained, positive breathing apparatus for large fires suitable for Hydrogen chloride fumes.

Section 6. Accidental Release Measures

Personal precautions
Restrict access to the area until completion of the clean-up. Ensure clean-up is conducted by trained personnel only. Wear safety goggles or face shield, protective clothing, gloves and boots preferably made of butyl nitrile

Environmental precautions May be harmful to aquatic life, do not allow to enter surface waters or sewers. No quantitative data is available on low level aquatic toxicity.

Clean-up methods
Small spills
Contain the spill. Mop up or soak with inert absorbent such as sand or clay for disposal. Wash spill area with large volumes of water, prevent from running into the environment, especially waterways. Dispose of residue in accordance with local or state regulations.

Large spills
Contain by diking with soil or other non-combustible sorbent material and pump into approved waste containers or absorb with non-combustible absorbent material. Collect product and contaminated soil for recovery or disposal. Wash spill area with large volumes of water and allow to drain into a waste treatment system. Comply with all local regulations on spill reporting, handling and disposal of waste.

GHS Disposal Precautionary Statement - P501 dispose of product and containers in accordance with National and / or regional Regulations refer SA National Environmental Management Waste Act - NEM: WA, it’s Regulations and local by-laws. This informs permitted Waste Facilities and Service providers see the South African Waste Information Centre sawic.environment.gov.za

SECTION 7. Handling and Storage

Precautions for safe handling – avoid contact with skin and eyes. wear appropriate personal protective equipment – see Section 8.
Eating, drinking and smoking shall be prohibited in areas where chemicals are handled, stored or processed. Workers must wash hands before eating, drinking or smoking to remove any chemicals that could be ingested or inhaled. Remove contaminated clothing and protective equipment before entering eating areas

Storage requirements: Store only in original container, in a cool place out of direct sunlight and avoid sources of potential contamination. Keep away from heat, sparks and flames. Use only with adequate ventilation.
SAFETY DATA SHEET
PLASTICLOR P52L
CHLORINATED PARAFFIN

Suitable materials
Store in lined mild steel containers , Stainless steel, HDPE – High Density Polyethylene, or reinforced UP Resin

Unsuitable materials
PVC – Poly Vinyl Chloride, PP – Polypropylene, PTFE - Polytetrafluoroethylene, most rubbers

Handling/storage precautions
Store in a cool well ventilated area. Keep containers closed.
Avoid breathing vapour, use only with adequate ventilation.
Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Wash contaminated clothing thoroughly before re-use.

SECTION 8. Exposure Controls/Personal Protection

Control parameters e.g. occupational exposure limit values or biological limit values

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>%</th>
<th>Exposure limits – OHS Act South Africa 1993</th>

<td>100</td>
<td>Not listed</td>
</tr>
</tbody>
</table>

ACGIH
TLV(TWA) No data available
TLV(STEL) No data available

Engineering control measures: Local ventilation should be available if mists are produced.

Personal protection – respiratory: Unlikely route of exposure, but if mists are encountered could be irritating to the respiratory tract, use NIOSH approved respirator.

Personal protection – hand: listed skin irritant thus avoid contact with this chemical. Wear rubber gloves.

Personal protection – eye: listed eye irritant thus wear safety glasses with side shields at all times. Contact lenses should not be worn.

Personal protection – skin: listed skin irritant thus wear overalls, safety shoes/boots and apron.

Personal protection – ingestion: Restrict access to unauthorized persons. Wash hands after contact.

Other protection - A safety shower and eye wash facility should be nearby and ready for use.

SECTION 9. Physical and Chemical Properties

Appearance: Clear, pale yellow mobile liquid.
Odour: Slight characteristic odour.
Odour Threshold: Not known
pH: Not applicable.
Initial boiling point/range: >395F (>200°C) @103100Pa Decomposes with the release of HCl
Freezing point/range: -49 to 32 F (-45 to 0°C)
Flash point: > 210°C.
Flammability: UEL: Not applicable LEL: Not applicable.
Auto flammability: No data available.
Explosive properties: Not applicable
Oxidising properties: None.
Vapour pressure: (2.7 x 10-4) KPa at 20°C
Specific gravity: 1.16 - 1.23 at 20°C.
Viscosity 0.4 – 0.8 Pa-s at 20°C.
Solubility - water Practically insoluble in water.
Solubility - solvent Soluble in many organic solvents. Slightly soluble in alcohol; Miscible with benzene, chloroform, ether, carbon tetrachloride; Insoluble in glycerine; Soluble in aromatic hydrocarbons, aliphatic hydrocarbons, ketones, esters, vegetable and animal oils

SECTION 10. Stability and Reactivity

Reactivity and Chemical Stability: Non-reactive and stable under normal conditions of storage and handling. Non-flammable under normal handling and storage conditions.

Hazardous polymerization Will not occur.

Conditions to avoid High temperatures and poor ventilation.

Corrosivity to metals Contact with iron, zinc or aluminium or their compounds, especially at elevated temperatures, may cause hazardous reaction and decomposition.

Incompatible materials Reacts with alkaline or alkaline earth metals which have a strong affinity for chlorine. "plasticlor" tends to soften or swell most rubbers.

Hazardous decomposition products Prolonged heating at temperatures in excess of 70°C or heating above 200°C for short periods will result in decomposition and liberation of hydrogen chloride.

GHS – EU Group Classification, and C & L Inventory:

Skin Corrosion/Irritation: Category 2, H315 Causes skin irritation
Eye Irritation: Category 2, H319 Causes serious eye irritation
Respiratory or skin Sensitization: H335 May cause respiratory irritation
Germ Cell Mutagenicity: Studies for mutagenicity were negative
Carcinogenicity: There is sufficient evidence for the carcinogenicity of a commercial chlorinated paraffin product of average carbon-chain length c12 and average degree of chlorination 60% in experimental animals. There is limited evidence for the carcinogenicity of a commercial chlorinated paraffin product of average carbon-chain length c23 and average degree of chlorination 43% in experimental animals. No data were available from studies in humans on the carcinogenicity of chlorinated paraffins. Overall evaluation: chlorinated paraffins of average carbon-chain length c12 and average degree of chlorination approximately 60% are possibly carcinogenic to humans (group 2b). This product is a C14-C17 chlorinated paraffin, medium chain product.

Reproductive Toxicity: No information is available, But this is listed under REACH as possible Lactation hazard that may cause harm to breast-fed children
STOT – Specific Target Organ Toxicity Single or Repeat Exposure: May cause respiratory irritation
Aspiration Hazard: Not Classified but inhalation of mist may irritate the respiratory tract
SECTION 12. Ecological Information

GHS – EU Group Classification, and C & L Inventory:
Hazardous to the Aquatic Environment
Acute (short term) Category 1 – Hazard Statement H400 very toxic to aquatic life
Chronic (long term) Category 1 – Hazard Statement H410 Harmful to aquatic life with long lasting effects

Laboratory Studies have shown chlorinated paraffin to be toxic to Daphnia, with a low level of toxicity to fish and algae.

Hazardous to the Ozone layer: No evidence - not Classified

Biodegradability - studies in soil showed a 51% degradation after 36 hours
Bio-accumulation - has limited potential for bio-accumulation
Mobility - No data available but limited potential

NB this product is on the EU CoRAP list for evaluation on PBT – persistency, bioaccumulation & toxicity

SECTION 13. Disposal Considerations

Disposal methods
Disposal must be made in accordance with the applicable National and Regional Government Regulations at approved and permitted chemical disposal sites – refer to the SA National Environmental Management Waste Act - NEM: WA, it’s Regulations and local by-laws. This informs permitted Waste Facilities and Service providers see the South African Waste Information Centre sawic.environment.gov.za

Disposal of packaging
Packagings and containers, even those that have been emptied, will retain product residue and vapours, handle empty containers as if they were full. Remove all possible traces of product and wash prior to disposal of packaging and containers. Dispose in compliance with Regulations – see above and Industry Best Practice Always observe and comply with hazard warnings.

EXCLUSION OF LIABILITY

All information and instructions provided in this Safety Data Sheet (SDS) in respect of the substance is given in terms of the provisions of the Occupational Health and Safety Act No 85 of 1993 and its Regulations. Information is based on best available scientific and technical knowledge as at the date indicated on this SDS, and is presented in good faith to be correct.

The information provided in this SDS apply only to the product in its present form and not to any formulation or mix. It should be used only as directed, and any formulations or other use is at the responsibility of the user of the product as formulated and/or mixed to investigate and establish any hazards or risks which may arise out of its use, wherever such user may be situated.

It is the legal responsibility of the person in receipt of this SDS, wherever such may be situated, to ensure that the information provided is communicated to, and understood by any person who may come in contact with the product in any place and in any manner whatsoever. If such recipient produces formulations or mixes using the product, then it is the recipient’s sole responsibility to comply with the provisions of the Act in respect of the provision of the necessary SDS, and/or to comply with any other applicable legislation.
